SUMMARY.

From the report of James W. Neill, Mining Engineer, and plans for economical development, as outlined by him. The mines owned by this Company are located in Yavapai County, Arizona, in the celebrated Big Bug Mining District, those now producing copper being situated on the ridge known as the Blife Bell Saddle. Many additional claims in the vicinity of this ridge are owned by this Company, and are now in process of development. The ore now being mined at the 270-ft. level indicates the persistency of the ore bodies, which will increase in volume and value as greater depths are reached. Contracts have been placed for the erection of a smelter, the building of a railroad to connect with the Station at Mayer, and the installation of machinery, buildings, etc., necessary for the more economic working of these mines.

The Company has no bonds or indebtedness of any character.
